Purpose of the programme
The objective of Intellectual Property Law programme is to prepare highly qualified intellectual property law specialists, knowing the peculiarities of legal protection of intellectual property on the international, European and national levels, able to explain the latest intellectual property law issues and trends, to analyse and assess legal solution related to the exploitation and enforcement of intellectual property rights, promptly and effectively deal with legal problems of intellectual property protection, conduct research and provide logical, motivated, efficient solutions.

10.

<b>Profile of the programme</b>		
<b>Study content: discipline(s)/subject area(s)</b>	<b>Orientation of the programme</b>	<b>Distinctive features</b>
<p>All the intended courses are within the study field of Law. The programme consists of 15 compulsory courses.</p>	<p>The programme is oriented towards academic research and professional practice: main fields of study for qualification are organized in a way which enables the graduates to put into practice the acquirements and capacities with skills for further self-guided academic research.</p> <p>The master of Intellectual Property Law study programme has the skills deepening character, aiming at further specialization within the Civil Law area prior studied by the learners in their bachelor-phase education studies.</p>	<p>The study programme is the first joint programme in Lithuania in the field of Intellectual Property Law carried out in two higher education institutions – Mykolas Romeris University (Lithuania) and Taras Shevchenko National University of Kyiv (Ukraine).</p> <p>The study programme will be performed in English language and it will give individuals the opportunity to gain a Master of Laws degree in two higher education institutions.</p>
<b>Qualification requirements and regulations</b>		
<p>According to the Description of the Lithuanian Qualifications Framework, level VII qualifications are acquired through graduate university (II cycle) studies.</p> <p>The qualification provides for complex activities consisting of different interrelated tasks which may cover several related areas of professional activities. That is the reason why the performance requires expert evaluation of the most recent knowledge in the close and more distanced areas of activities; discovery of new facts in applied research of the professional activity area, creative theoretical knowledge and application of the results of scientific research.</p> <p>The activities are performed independently, by way of setting prerogatives of an activity area, making independent decisions, which are oriented towards improvement and perfection of the activities. The activities imply managing the activities of other employees, thus qualifications of this level include abilities to independently carry out applied research, to provide consultations in an area of activities, to coordinate projects related to the upgrading of other individuals' qualifications and implementation of innovations, to analyse and present activity results.</p> <p>As the technological, management and organizational progress is witnessed in all areas of activities, the activities and their environment are subject to constant change, the changes are difficult to anticipate, the activities consist of volatile combinations of tasks. The activity change requires the ability to make innovative decisions based on research results, to assess alternative solutions and possible social and ethic consequences of the activities.</p>		

11.

Admission requirements	Specific arrangements for recognition of prior learning	Specific requirements for graduation
Students wishing to participate in the Programme will need to have obtained a first cycle degree in law (Bachelor of Law). The candidates must have very good knowledge and skills of English (at least B2 in the Common European Framework of Reference for Languages).	The learning results of the informal learning are not recognized.	To complete 120 credits, prepare and successfully defend Master's thesis and successfully pass the State exam.

12.

Access to further studies
Master degree is a necessary prerequisite to enter the third cycle studies.

13.

Occupational profiles of graduates with examples
Graduates who have successfully completed joint master programme Intellectual Property Law and earned Master of Laws degree will have excellent career opportunities both in graduates' home country and abroad. Degree holders will be able to work in the public sector (for example, in the European institutions, international institutions, national parliaments, governments, international, regional and national courts, quasi-courts, regulatory agencies, other supranational, state and municipal administration entities, engaged in legal framework architecture, administrative regulation, fighting law infringements or dispute settlement related to intellectual property protection) as well as in private sector (legal consulting service providers, companies working in any business sector and dealing with intellectual property protection), in academic and research institutions.
