We are currently looking for **ENTRY-LEVEL/JUNIOR .NET DEVELOPER** to join our team

StrongPoint develops, integrates, and sells technology and software solutions for retail and provides maintenance and support services. The company has 15 offices and unites 450 employees in Scandinavia, the Baltics, other parts of Europe. Approximately five million retail customers use StrongPoint retail technology every day.

Requirements:

- Knowledge of C# programming language and .NET;
- Very good English and Lithuanian skills;
- You are a student of engineering, computer science, mathematics or other related field;
- Ability to work within a team;
- Solution-oriented mindset and can-do attitude;
- Interest in the latest trends in technology and personal growth.

Your responsibilities will include:

- Develop and deliver software solutions for our clients;
- Troubleshoot issues/errors and come up with resolutions;
- Analyze and maintain existing software applications.

Company offers:

- Good opportunities to develop competencies and skills;
- The freedom and the whole playground to implement your ideas;
- A mentor to support you;
- Flexible work schedule to combine work and studies.
