

GIORGIN.

Master degree graduate

Subject area: **Social Work with Children and Youth**

Activity for traineeships in **Greece**

"The ERASMUS internship is the best way to learn if you are in the beginning of your career, or if you have already started your career. The internship will expand your knowledge and gain some kind of experience even if you have a different specialization of education from your internship."

As I experienced myself, the MRU mobility for traineeship office will always give you advice and support on everything that you need to prepare for your internship. Doing internship in the European Union you can learn about the culture and the people and even you could be settled in that country if the organization wants you to stay there and offer you a job.

The finance support from ERASMUS+ will give you an important boost which you will need and use it for your own benefit (rent, air ticket, etc)."

Don't waste the internship opportunity and "take advantage" of the kindness of the officials at MRU mobility office. The ERASMUS internship may change your course life."
