

STUDENT FEEDBACK OF ERASMUS+ TRAINEESHIP

- Seyma Topaloglu in Turkey -

“

During my traineeship, I was responsible for a range of tasks related to *web application firewalls* and various domains, including *security architecture, network security, authentication and authorization protocols, cryptography, and application security*. Some of the specific tasks that I completed during this period included *conducting research and analysis* on security trends and best practices to inform the development of effective security strategies; *collaborating with team members* to design, implement, maintain secure systems and applications ; and *participating* in security audits and vulnerability assessments to identify and address potential weaknesses in systems and applications.

Through these tasks and responsibilities, *I gained valuable experience* and knowledge in the field of cybersecurity and developed a strong understanding of key concepts and practices related to web application security.

These **competencies** were acquired through *practical experience and training*, which enabled me to approach challenges with a *problem-solving mindset* and develop effective solutions that address both technical and strategic requirements.

Overall, my traineeship provided me with valuable experience and knowledge in the field of cybersecurity. The tasks and responsibilities that I completed allowed me to develop my skills in *web development, security, and risk management*. I am grateful for this opportunity and feel that *I have grown both professionally and personally as a result of this experience*.
