

*This experience will enrich and inspire you for leading and magnificent works.*

During spring semester, I decided to apply for Erasmus+ studies at Josai International University, Japan. The process of making a visa, getting all needed documents was not easy and light. But it definitely was worth it. I spent 4 months in Japan. During that time, I learned and gained a lot of good things. First of all, I had the opportunity to study and be inside Japanese society and to be a part of it. We can experience things as Japanese people. Also, a chance to gain absolutely new experience, exchange the knowledge with students from different countries. Moreover, Erasmus+ program helped me to make new acquaintances with people almost all over the world and make new connections. Last, but not least, the chance to examine myself in variety of critiques situations.

I highly recommend the Erasmus+ studies for every student. This experience will enrich and inspire you for leading and magnificent works.
