

*I am very happy with my exchange studies in Palacky university, I wouldn't change anything about it apart from putting this university in the first place in my Erasmus+ priority list.*

I didn't expect much from Czech Republic. When I saw that I got in Palacky university (this university wasn't my first choice) I was questioning myself if I should go there, it will be too hard because I will be alone there and etc. Therefore, I made up my mind and decided to trystudying abroad in Czech Republic. Palacky university is in Olomouc - a smaller city in east side of Czechia. I was surprised to see how beautiful the city and university campus is. I lived in a dormitory that was located further from city centre. I met my Spanish roommate with whom later I became best friends for this experience, and I believe for my whole life too.

Members from ESN organisation made sure that our experience in Olomouc would be unforgettable. They prepared many activities from trips to Prague, Krakow and Budapest to pub crawls and national presentations. By attending these activities, I made friends from many countries. Of course, Erasmus+ is not only about having a good time and partying. My studies were difficult for me because all of my courses were for master students, so I did have to work harder to get to other students' level. Courses were interesting, I worked a lot on writing articles and researching. I got a chance to study Korean language from linguistic point of view and that indeed helped me to understand some rules better. I think it will help me in the future to write my bachelor thesis. Overall, I am very happy with my exchange studies in Palacky university, I wouldn't change anything about it apart from putting this university in the first place in my Erasmus+ priority list.
