

It's hard for us to underline something specific about the University because we actually liked everything in it.

University

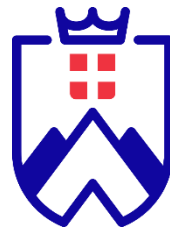

We got an amazing once in a life time experience to study at the University of Savoie Mont Blanc. It's hard for us to underline something specific about the University because we actually liked everything in it. The university has a friendly atmosphere. The people are welcoming, and you get used to their lifestyle and start to be more integrated with the international community there. We met many different people from different countries in the Erasmus community and also in our classes. It was more interesting to study with other international students and local French students, because all of the students were from various countries had different experiences and opinions, we were able to learn about their different cultural backgrounds.

Accommodation

We were given rooms in a student dormitory. The rooms were quite small but very comfortable and tidy. They were well cleaned and modern with everything you need to live and study, however the internet was a bit slow. The kitchen was well equipped however was sometimes dirty. The dormitory staff were very hospitable, polite and friendly.

City

Chambery is located in the southeastern part of France, it is a small but very livable city where you can find everything you need. The city is very beautiful and there were many places to visit. In addition, it is convenient to travel from this city, because there is a railway station from which you can get anywhere at an affordable price. The city is located near the border with Switzerland and Italy, so you can travel even there.
