

Upcoming summer of the year 2024 is full with wonders. One on the wonders are the Summer Schools that will be organized by the Riga Technical University.

In the Summer of 2024 we are planning to offer five summer schools:

- [Nanophotonics: close-up for the future](#)
- [Swarm Master: Drone Fleet Commander Bootcamp](#)
- [The NEXT | The Young Global Leaders Camp](#)
- [Intensive English and Cross-Cultural Communication](#)
- [Time Capsule of Latvian Footprints](#)

You can find more detailed information (including dates, pricing, etc.) in our web page - <https://www.rtu.lv/en/studies/short-term-studies/summer-schools>

Please note that application for the summer school is possible via our web page!

I would like to remind that RTU Summer Schools are a fantastic combination between knowledge development, practical skills furtherance and enjoying life and a new friendship☺

Kind regards,

**Artūrs Lūsis**
