

My autumn semester at Palacky University in Olomouc, Czech Republic was filled with an unforgettable experience of gaining even better academic knowledge, expanding my views on another culture, and developing better communication skills in my second language. As for my personal view on Erasmus experience I can only say that it is the best provided opportunity for students. It opens many doors for you to experience every given event to its fullest, not being afraid of challenges and having gained personal experience, that can be put into personal improvement. With this Erasmus experience, I was extremely glad that I had decided to go, to study in a foreign country, It was one of the most greatest decisions that made me see the importance of having different academic and life experiences and encouraged to seek every opportunity, see my capabilities and limits to the fullest and exceedingly. As for recommendation to other students that might be conflicted whether they should apply for this opportunity or not, undoubtedly I say to go there – only when you get to experience with life, studies and culture of and in a foreign country you can confidently say that you gained experience and unforgettable memories that stay with you for a life time. And a honourable thank you goes to the entire international office team, because without their help and dedication my experience wouldn't be possible.
