

INVITATION TO LECTURE:

Technology and Corporate Insolvency Law

This lecture investigates the use of technology to solve corporate financial distress. How can platforms and electronic communication contribute to reducing insolvency costs? What is the use case for AI before and in corporate insolvency? Against this background, the session also engages with the role of contract and the importance of data in addressing the challenges of financial distress.

7 November 2025,
14:30-16:00 (EEST)

MRU, I-324, Ateities St. 20, Vilnius

**The lecture will be delivered
by Prof. Felix Steffek**

Who should attend?

The lecture is intended for: doctoral/master students

FELIX STEFFEK

Felix Steffek is Professor of Law at the University of Cambridge and Senior Member of Newnham College. He serves as Deputy Chair of the Faculty of Law, Co-Director of the Centre for Corporate and Commercial Law (3CL) and holds a University JM Keynes Fellowship in Financial Economics. He is Global Distinguished Professor of Law at the University of Notre Dame, Research Member of the European Corporate Governance Institute (ECGI) and Principal Legal AI Advisor at Thomson Reuters.

His research interests cover corporate finance and insolvency law, artificial intelligence, dispute resolution and commercial law. He has advised international organisations, governments, parliaments, courts and startups in these areas. He represents law on the Academic Publishing Committee of Cambridge University Press.

Felix Steffek is leading multiple research projects on artificial intelligence and law, among them the Nuffield Foundation funded project on 'Access to Justice Through Artificial Intelligence' and the AHRC funded project on 'Explainable and Ethical Legal Artificial Intelligence'.
