

Embark on a journey into the Ports of the Future, with our International Summer School in Le Havre – 15th to 19th June 2026

Université Le Havre Normandie (ULHN) invites students from around the world to explore the future of ports: how they evolve, meet contemporary needs, preserve their heritage, and integrate principles of sustainable development and technological innovation. The programme is part of a strategic partnership led by the **Campus Polytechnique des Territoires Maritimes et Portuaires (CPTMP)** and is funded by the **French National Research Agency (ANR)** to support activities within the **EUNICOAST European Alliance**, as well by the **Erasmus+ programme**.

From 15th to 19th June 2026, our Summer School will be held in Le Havre, France, at Université Le Havre Normandie. Fully taught in English, our programme will combine lectures, workshops led by professionals, port visit, and cultural activities. This second edition is part of an **Erasmus+ Blended Intensive Programme** in collaboration with universities **West Pomeranian University of Technology in Szczecin (ZUT)** and **Stralsund University of Applied Sciences (HOST)**, members of our **EUNICOAST Alliance**.

3 ECTS may be awarded upon successful completion of all components, subject to home university validation. Compatible with the Erasmus+ mobility scheme.

Sending institutions may nominate up to five students for participation in the **Summer School**, in line with the programme's academic and eligibility criteria. All nominations must be submitted **before 30th of April** to the following address: summerschool@univ-lehavre.fr.

Please note that the number of places available is limited. Submission of a nomination does not guarantee acceptance, and all nominated candidates will be subject to a final selection process by the host institution.
