

Erasmus 2026

Germany, Mannheim

Kornelija Maja Babašinskytė

I was a second-year psychology student. I took place in Erasmus program in Germany. I heard a lot of good things about education in Germany so I was intrigued. By my experience courses were very interesting in the way that every seminar we were doing tasks with other students and everyone was freely speaking with lecturer being understanding and politely correcting if a student is wrong. Lecturers were very helpful, we could send our presentations, and they would say what can be changed before presenting it.

I visited a few cities while being in Germany, like: Wiesbaden, Cochem, Stuttgart, Schwangau and Frankfurt. The most memorable city was Schwangau because there is Neuschwanstein castle which I wanted to visit since arriving to Germany.

I was also proven wrong that every citizen in Germany abides to law. When I was in Berlin no one was crossing a road when light was red, but in Mannheim as well as Wiesbaden and Frankfurt I saw that a lot.

This experience taught me much more than I anticipated, for example: some life lessons and culture of another country.
